A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status							
1) Responsive to communication(s)	filed on <u>25 Septe</u>	mber 2001 .					
2a) This action is FINAL.	2b) This act	ion is non-final.

Art Unit: 2858

DETAILED ACTION

Priority

The status of nonprovisional parent application should be updated to include the expression "now Patent No. 6,459,259" following the filing date of the parent application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-87 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1-86 of U.S. Patent No. 6,459,259. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed invention in the instant Application is

Art Unit: 2858

broad in scope, which includes the common claimed limitations disclosed in the Patent 6,459,259.

Regarding Claims 1, 44, the claimed invention recites a method and a system for testing devices carried by at least two test trays, comprising: transporting a first and a second tray along a first and second transport paths to a first and second test position, respectively, and testing at least one device on the first and second tray, at the first and second test position, respectively.

Regarding Claims 22, 65, the claimed invention recites a method and a system for testing devices carried by at least two test trays, comprising: transporting a first and a second tray in parallel to a first test position and a second test position, respectively, and testing at least one device on the first and second tray at the first and second test position, respectively.

The patented claims recite transport mechanisms for providing a plurality of test tray transport paths to transport substantially simultaneously a plurality of test trays in a generally parallel manner from the loader section through the testing section to the unloader section.

It would have been obvious at the time the invention was made, to a person of ordinary skill in the art to use the common claimed limitations of the Patent for the purpose of defining the claimed invention in the instant Application, since the claimed subject matter is already disclosed in the patent regarding a tester for semiconductor devices and test tray used for the tester.

Art Unit: 2858

In this case, the fact that the claims were restricted in the parent application 09/254,084, it does not prohibit a Double Patenting rejection in the present application, see MPEP 804.01.

The following are situations where the prohibition of double patenting rejections under 35 U.S.C. 121 does not apply: The claims of the different applications or patents are not consonant with the restriction requirement made by the examiner, since the claims have been changed in material respects from the claims at the time the requirement was made. For example, the divisional application filed includes additional claims not consonant in scope to the original claims subject to restriction in the parent. Symbol Technologies, Inc. v. Opticon, Inc., 935 F.2d 1569, 19 USPQ2d 1241 (Fed. Cir. 1991) and Gerber Garment Technology, Inc. v. Lectra Systems, Inc., 916 F.2d 683, 16 USPQ2d 1436 (Fed. Cir. 1990). In order for consonance to exist, the line of demarcation between the independent and distinct inventions identified by the examiner in the requirement for restriction must be maintained. 916 F.2d at 688, 16 USPQ2d at 1440.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES C. KERVEROS at (703) 305-1081 or the examiner's supervisor, N. LE at (703) 308-1436.

Any inquiry of a general nature relating to this application should be directed to the receptionist at (703) 305-4900.

The official Fax numbers for the organization are (703-872-9318) Before-Final and (703-872-9319) After-Final Office actions.
